

I have proudly served on the Aurora Soccer Club Board for the past three years, where I currently serve as Vice-President and as part of the team working toward a new indoor facility for our players and families. As a parent of three girls who play in the U7, U9, and U11 programs, I've seen firsthand the positive impact Aurora has in helping kids grow in confidence, teamwork, and community.

Outside of soccer, I bring over 20 years of experience in land development and community building. I'm currently the President & CEO of USask Properties Investment Inc., the organization leading the development of the University of Saskatchewan's endowment lands into vibrant mixed-use communities. Before that, I held senior roles with Dream Developments, helping shape some of Saskatoon's most successful neighbourhoods. I also served as Chair of the Saskatoon & Region Home Builders' Association, where I worked with local builders and municipalities to strengthen housing and community development across the region.

I believe strongly in the values of sport and the role organizations like Aurora play in building community. My goal is to continue contributing my leadership and planning experience to help Aurora grow — ensuring we have the right facilities, programs, and partnerships in place to serve our players for generations to come
